Responsive Web design: Responsive Web Design is about using HTML and CSS to automatically resize, hide, shrink, or enlarge, a website, to make it look good on all devices (~~desktops, tablets, and phones~~). A responsive web design will automatically adjust for different screen sizes and viewports. **Bootstrap** is a CSS framework which uses HTML, CSS and jQuery to make responsive web pages. Bootstrap is an open source toolkit for developing with HTML, CSS, and JS and it's a world's most popular front-end component library. Bootstrap has light but powerful plugin built on ***jQuery***. **XAMPP: XAMPP (/ˈzæmp/ or /ˈɛks. æmp/)** is a free and open-source cross-platform web server solution stack package developed by Apache Friends, consisting mainly of the Apache HTTP Server, MariaDB database, and interpreters for scripts written in the PHP and Perl programming languages. **assum the following line of text is scrolling or moving text effect (Marquee).**
